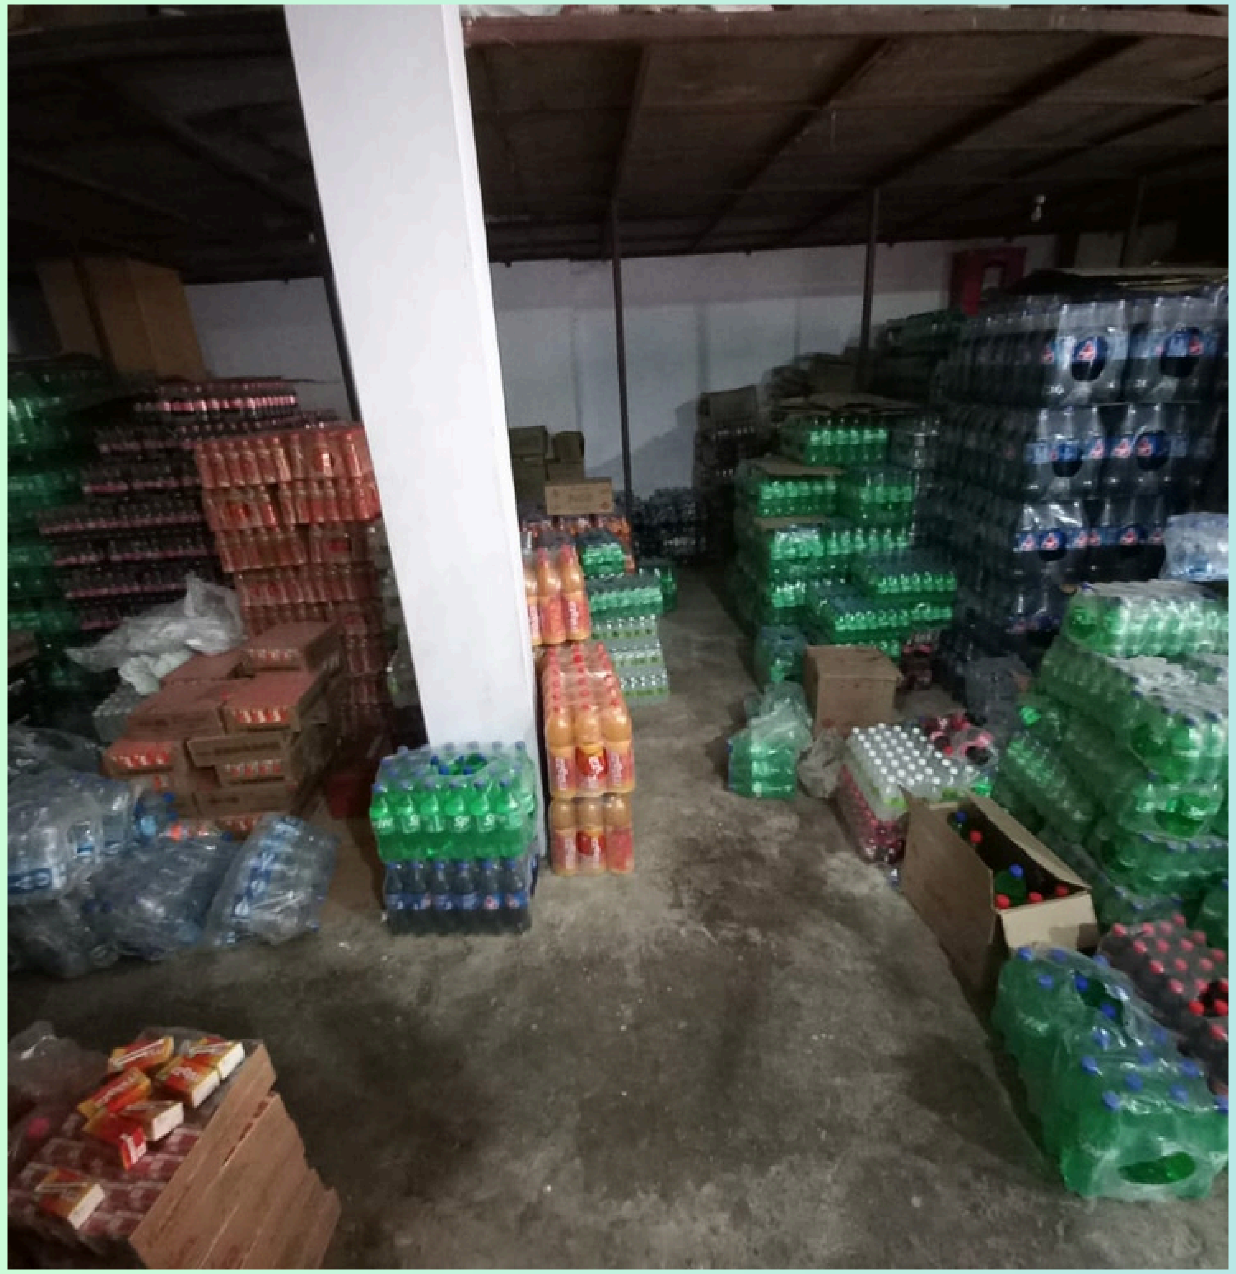
SHIVA ENTERPRISES :-

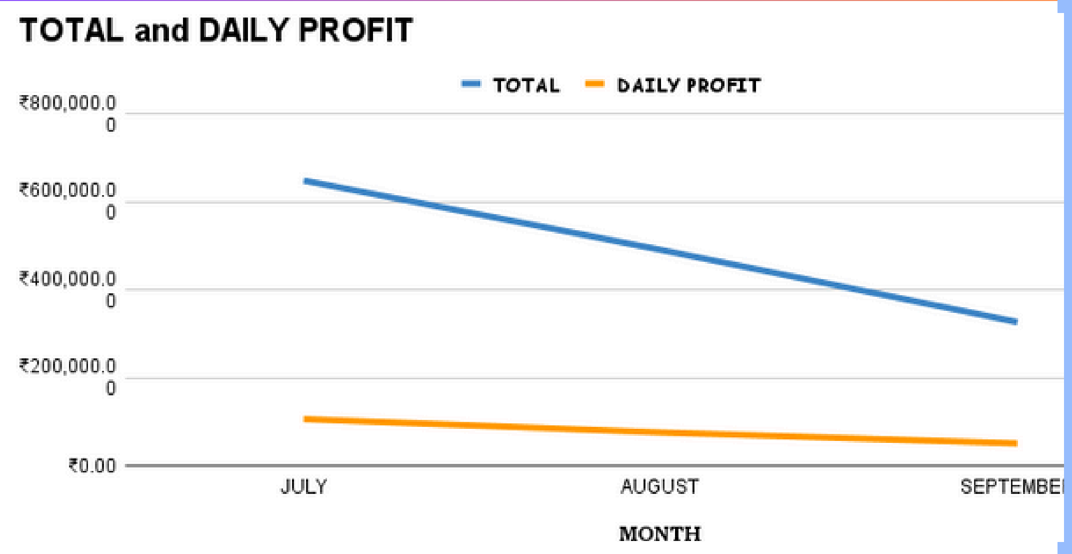
Store Overview: SHIVA ENTERPRISES is a local wholesale dealer of cold drinks based in Ghazipur, Uttar Pradesh.
Current Situation: As this business affect majorly due seasonal fluctuations, we can see a drop in sale after summer season months. Facing difficulties related to tough market competition, sales forecasting.
Target: Increasing profitability of store.
Increasing sales in least selling months.



Market & Customer Trends

Market: Coca-Cola dominates the market share worldwide with a share of around 48%, while Pepsi has a share of approximately 20.5%.
Products: Large diversity for Pepsi and Sprite respectively while in water Kinley is in demand
Customers: Mostly town oriented customers looking for supply.

Financial Performance



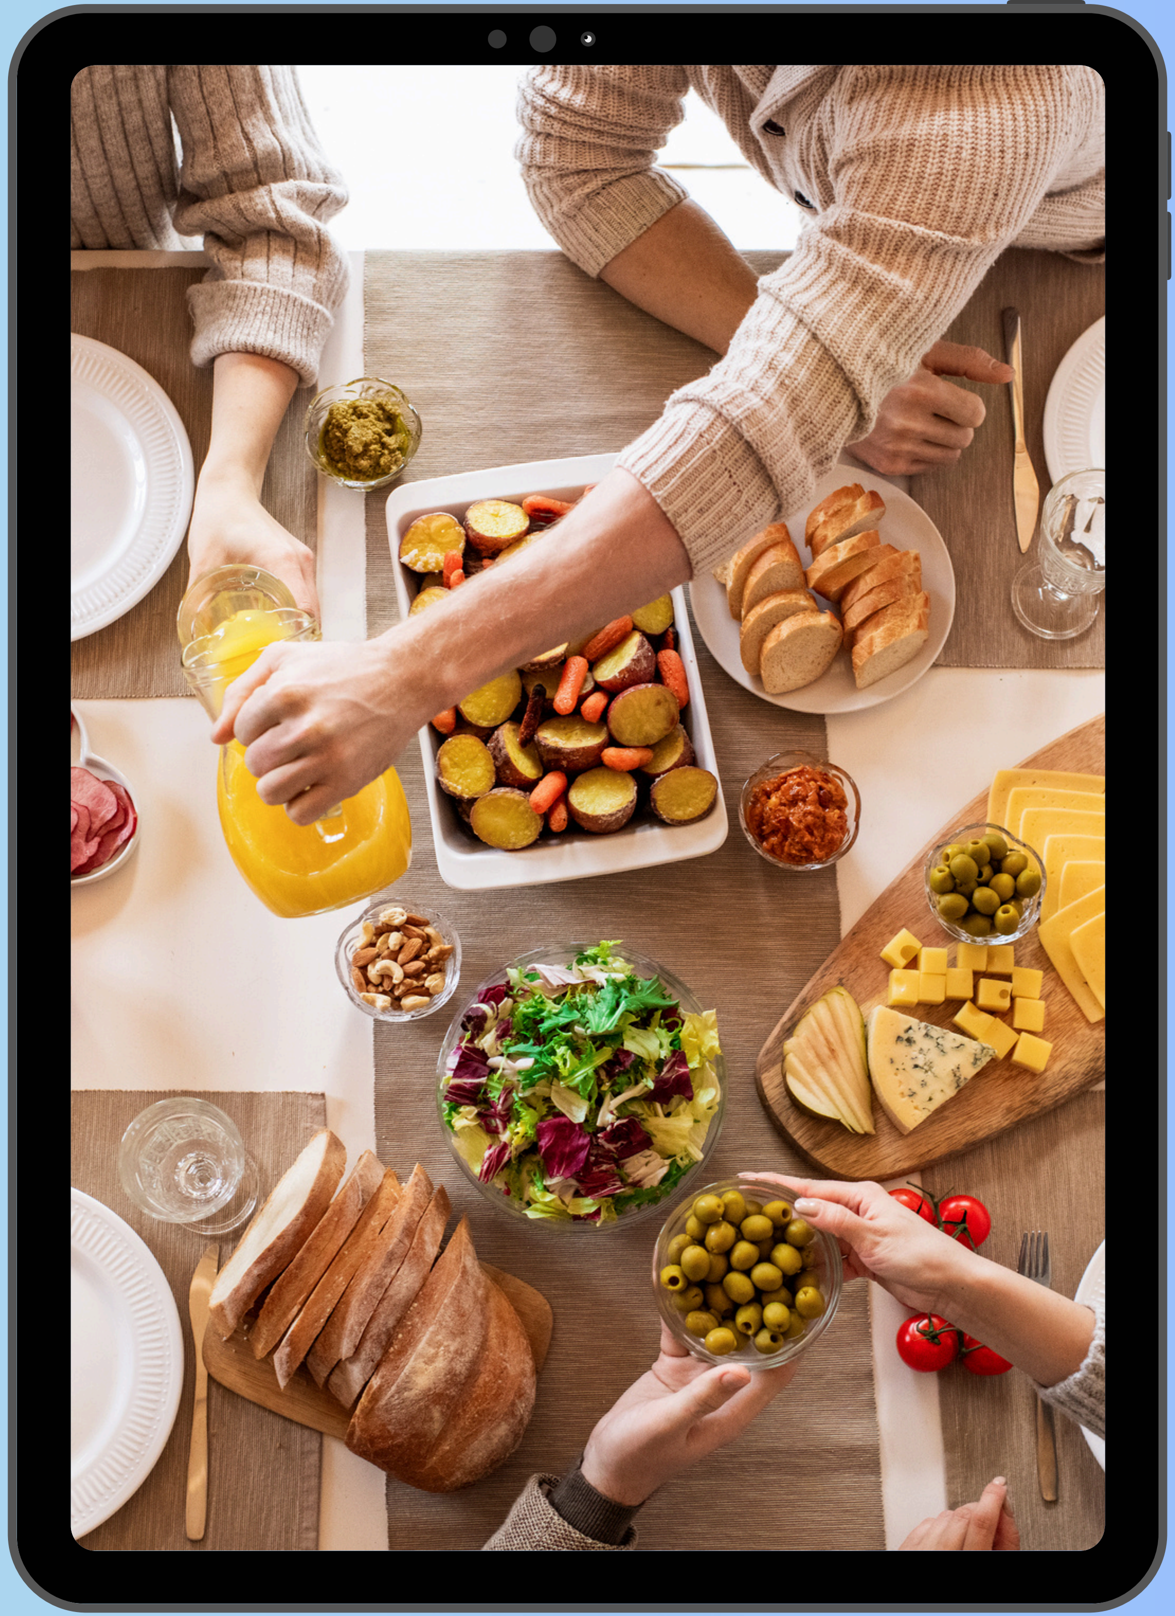
in July: sales > 6lakh
in August: sales between 4-6 lakhs
in September: low sales between 2-4 lakhs

Problems:

Inventory Management: Excessive inventory in stocks is creating financial blockage, holding huge amount of capital in access stock, limiting resources which could be invested in business growth.

Seasonal Variations: Seasonal variations in sales refer to the fluctuations in sales levels that occur due to seasonal factors such as weather, holidays, and cultural events. These variations can impact different industries and products differently.

Market Competition: Market competition in sales refers to the presence of stores in the same market segment to attract customers and increase their market share. It is a critical aspect of business strategy and can have a significant impact on pricing, marketing tactics, product development, and overall business performance.



What We Can Do

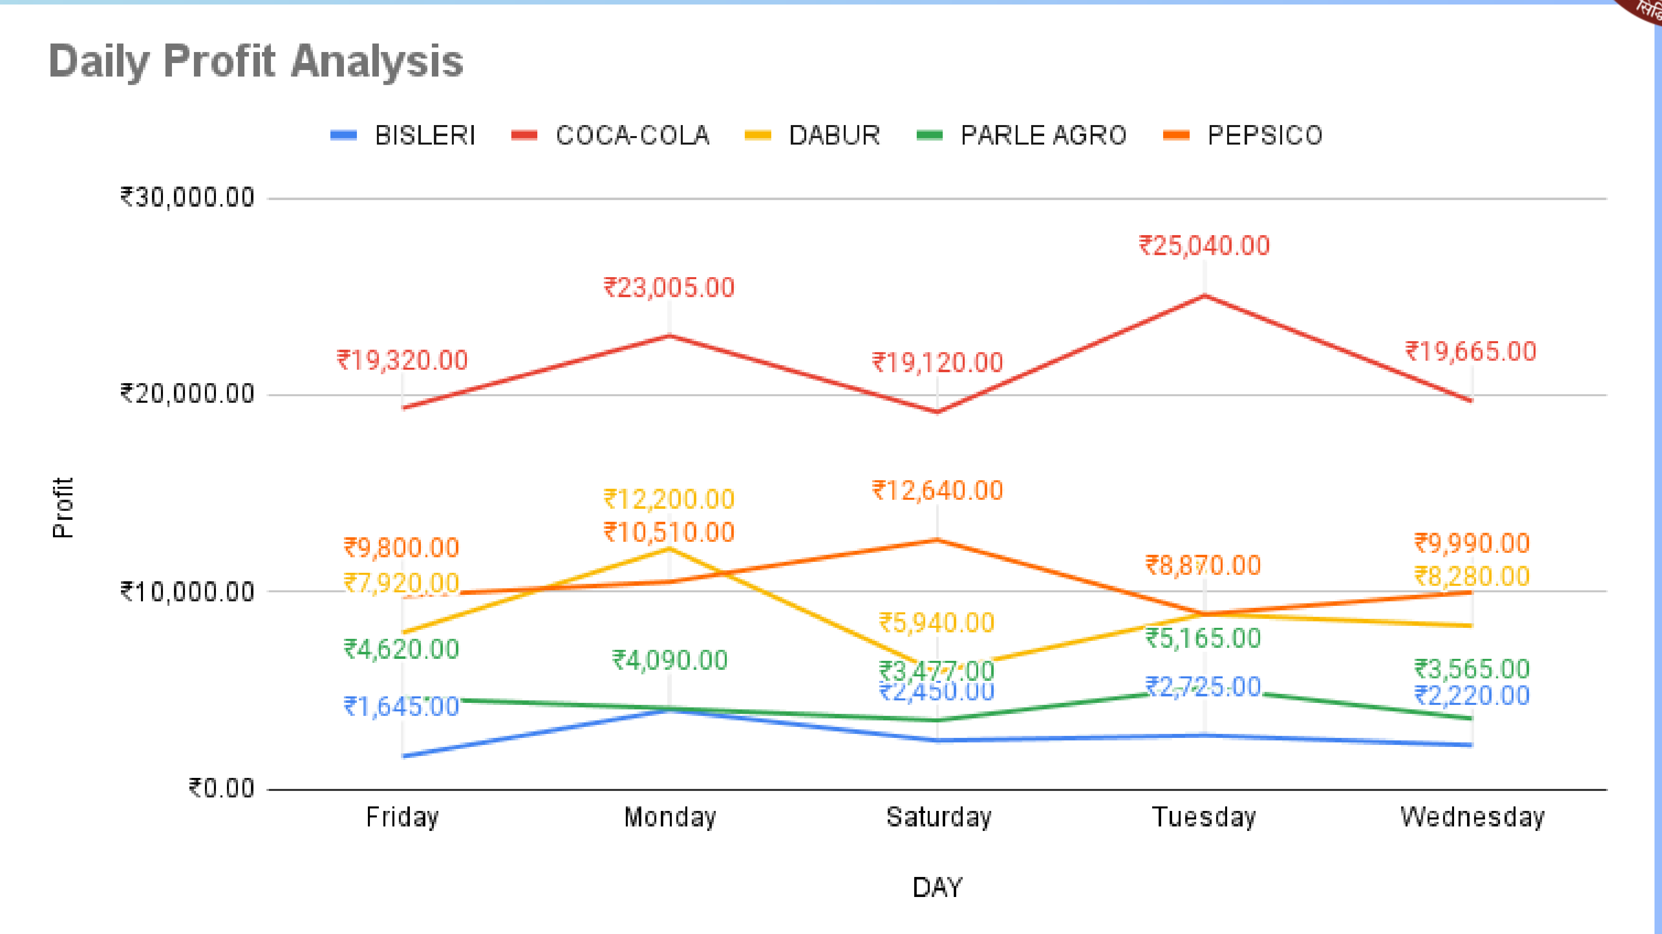
By Implementing demand prediction techniques for better expectation of customer preferences and enhance in inventory levels. By doing this store owner can prevent overstocking and enhance operational process.

Implement a seasonal sales strategy that includes targeted promotions and marketing campaigns during peak seasons, optimize inventory management to meet seasonal demand fluctuations, and diversify product offerings to appeal to seasonal trends.

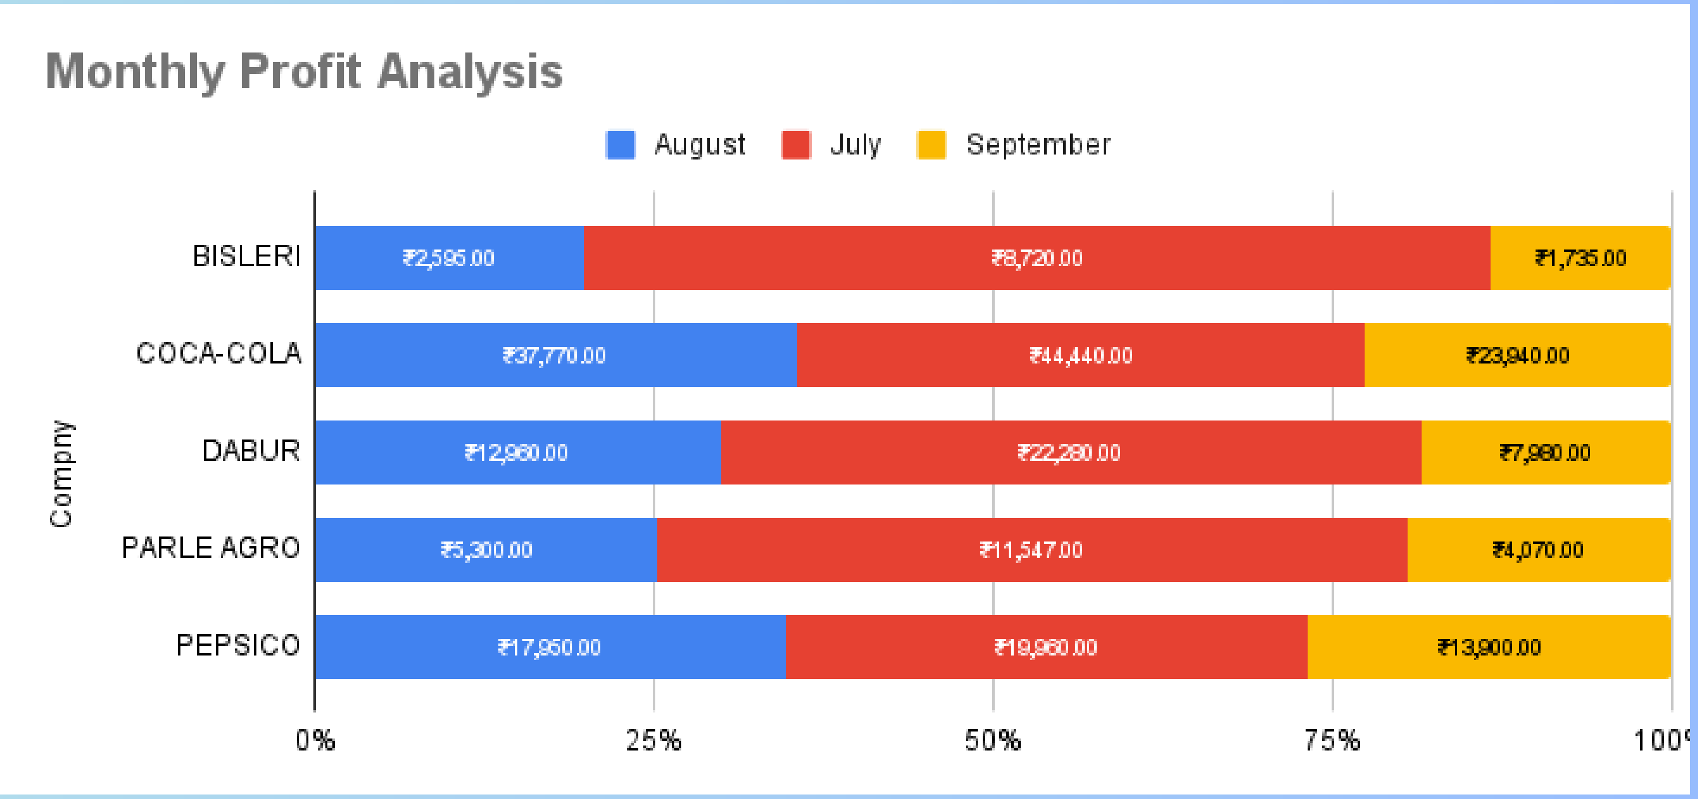
To address market competition, focus on differentiation by offering unique value propositions, improving customer service, enhancing product quality, and leveraging data-driven insights for targeted marketing strategies.

Financial Performance

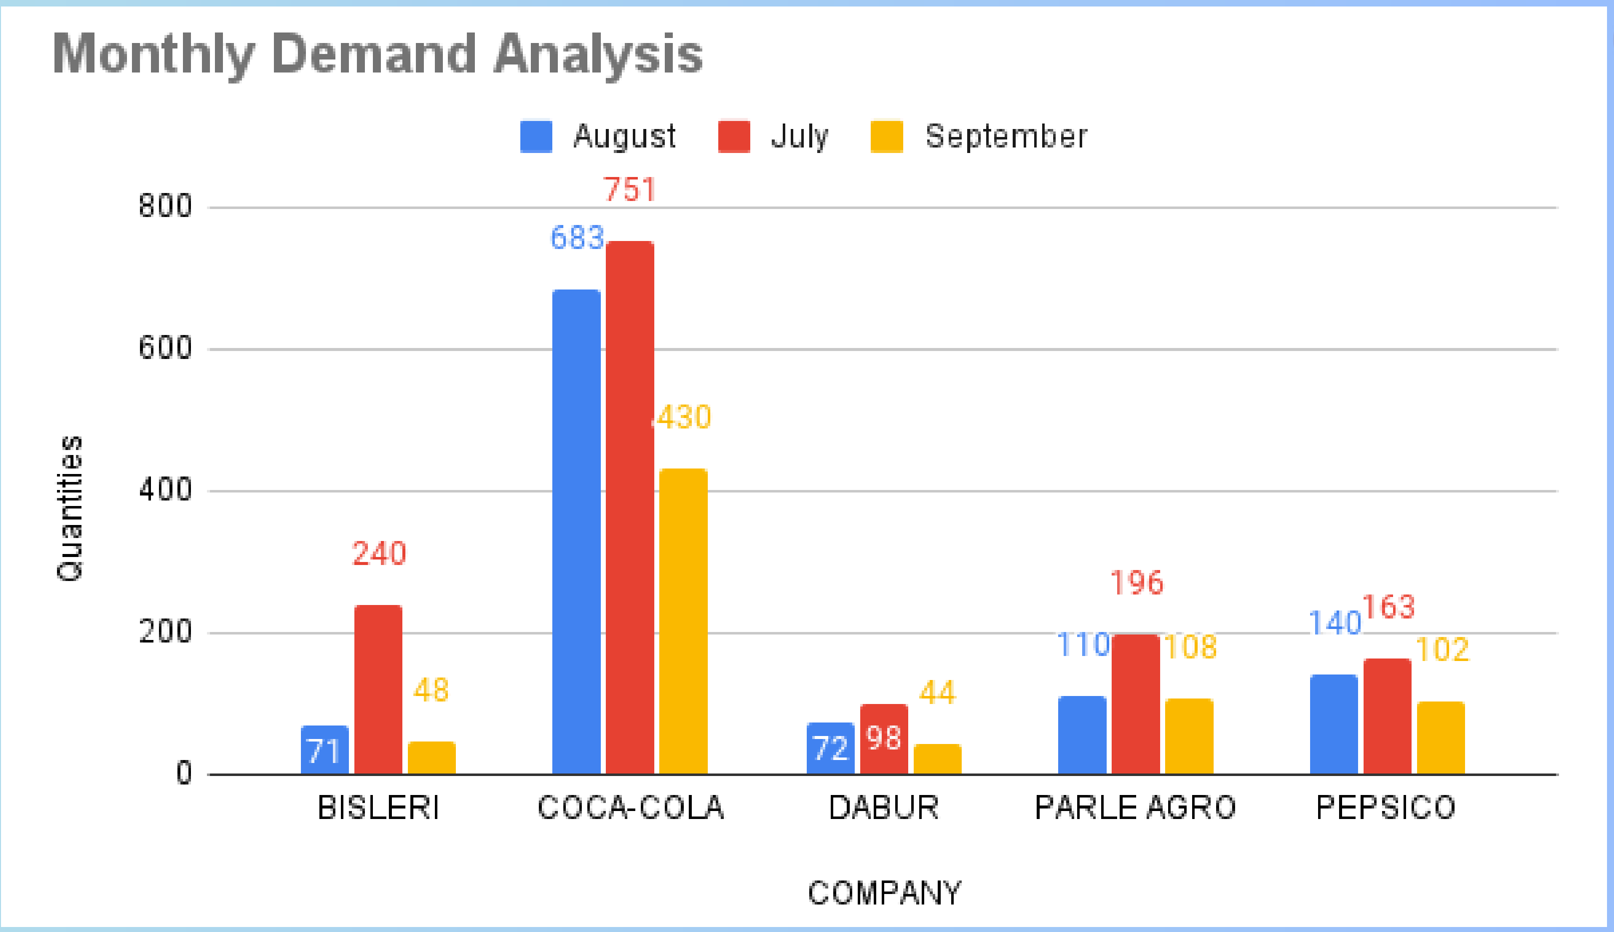
- Day-wise analysis involves examining sales or other relevant metrics on a daily basis to understand patterns, trends, and variations. Based on the analysis, Coca-Cola consistently shows higher demand compared to PepsiCo, Parle Agro, Bisleri, and Dabur across all days.



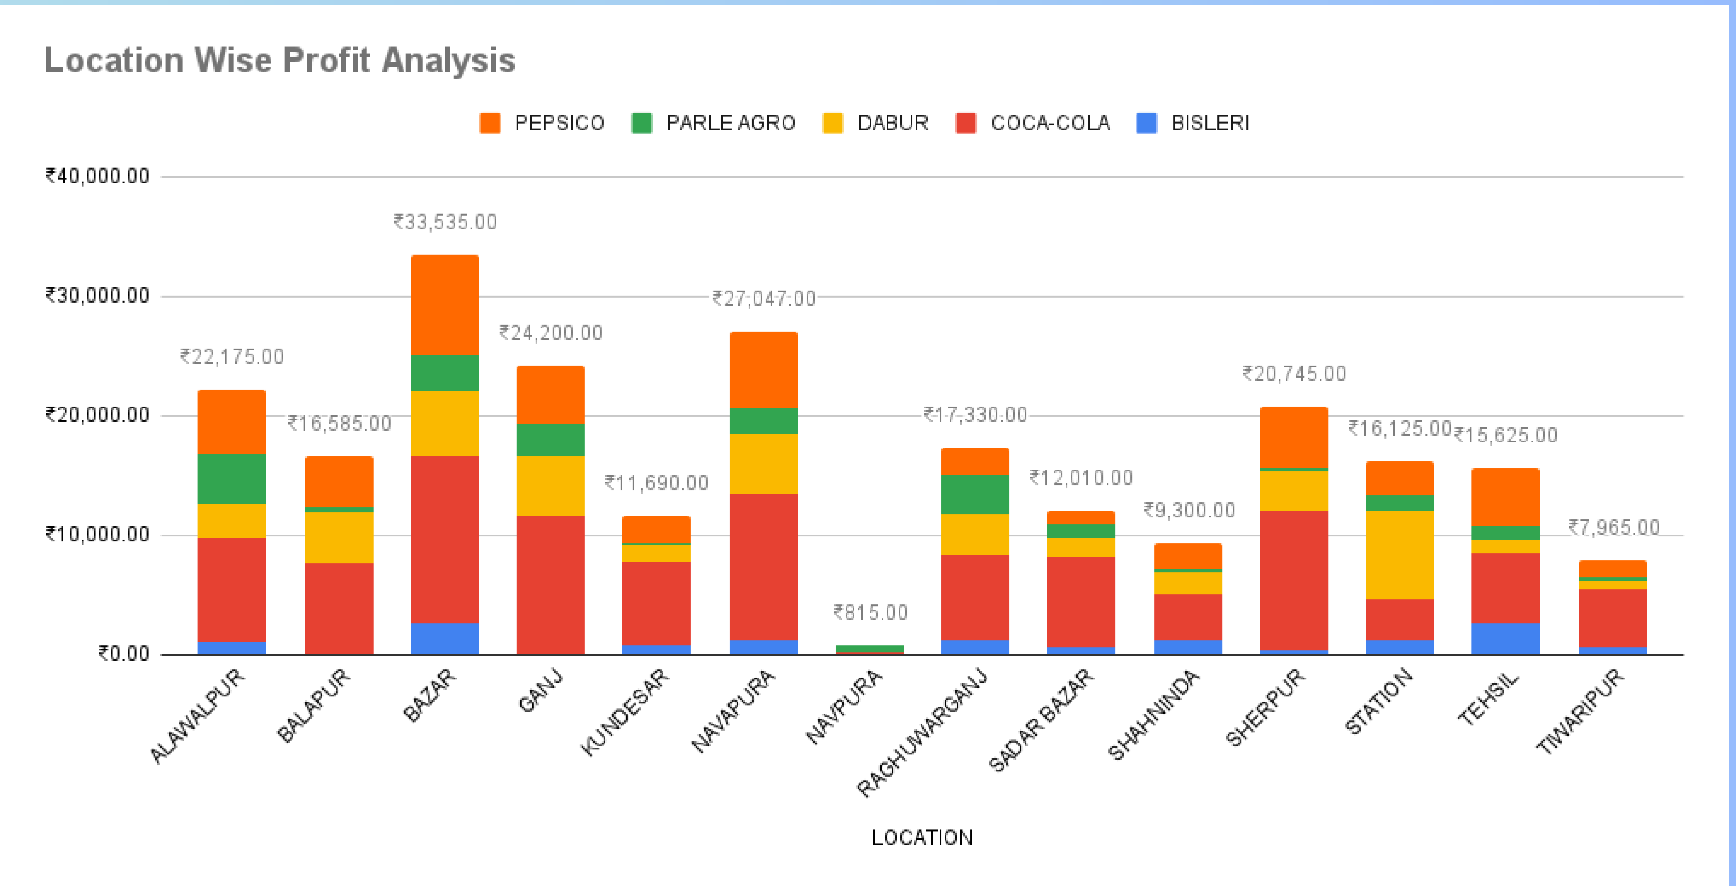
- The chart provides a clear picture of how total sales were distributed across July, August, and September, with July accounting for the highest share (45.4%), followed by August (32.5%), and September (21.9%). This trend offers valuable insights into seasonal variations and can inform strategic decisions related to inventory management, marketing, and sales promotions.



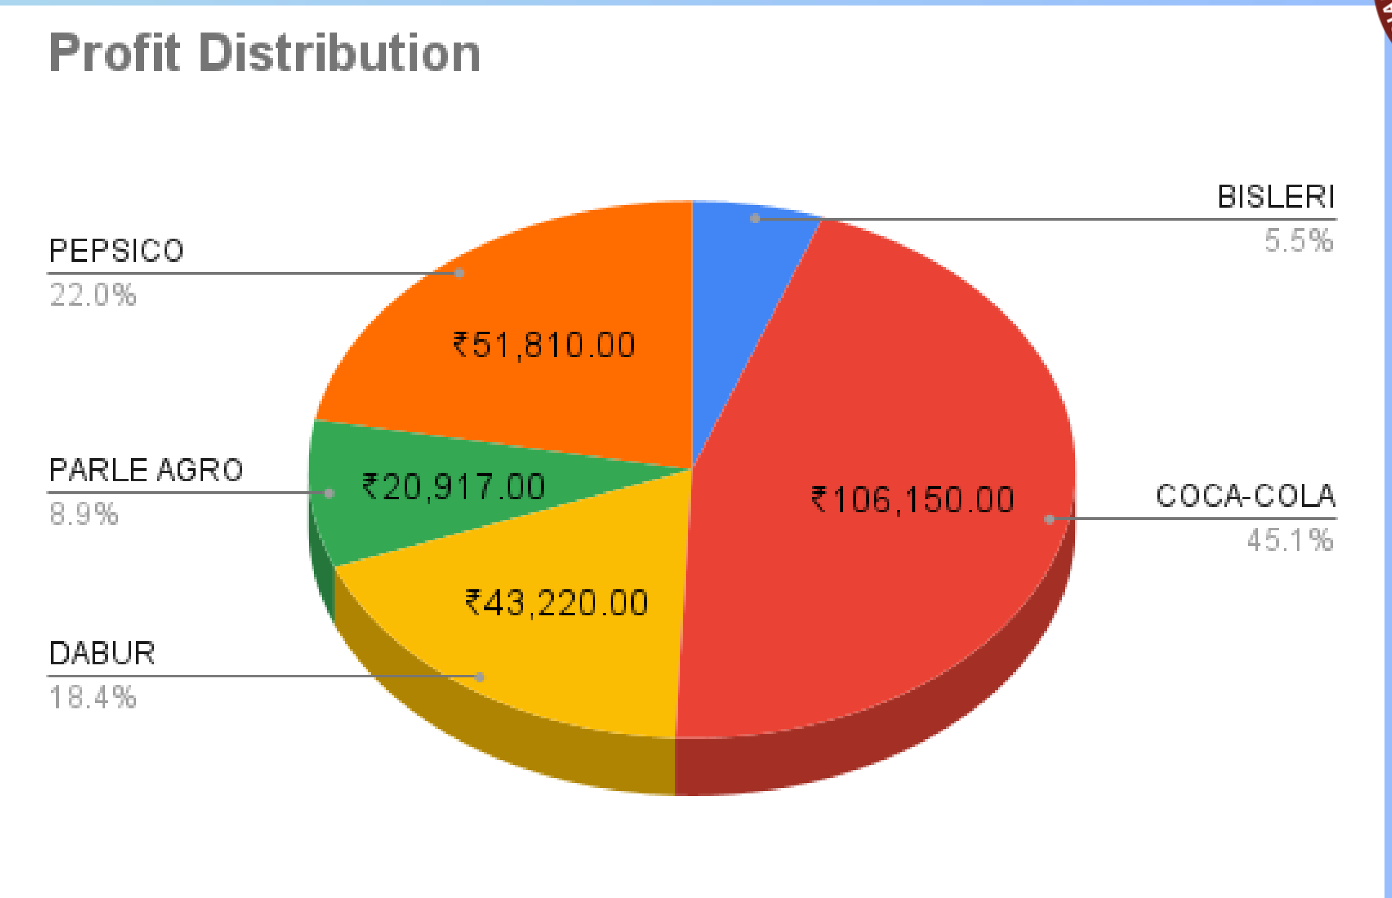
- The analysis reveals that Coca-Cola consistently has the highest demand across all months, followed by PepsiCo, Parle Agro, and Bisleri. Dabur, on the other hand, has the lowest demand in terms of quantities. This information can be used to tailor marketing strategies, manage inventory, and optimize production to meet varying demand levels throughout the year.



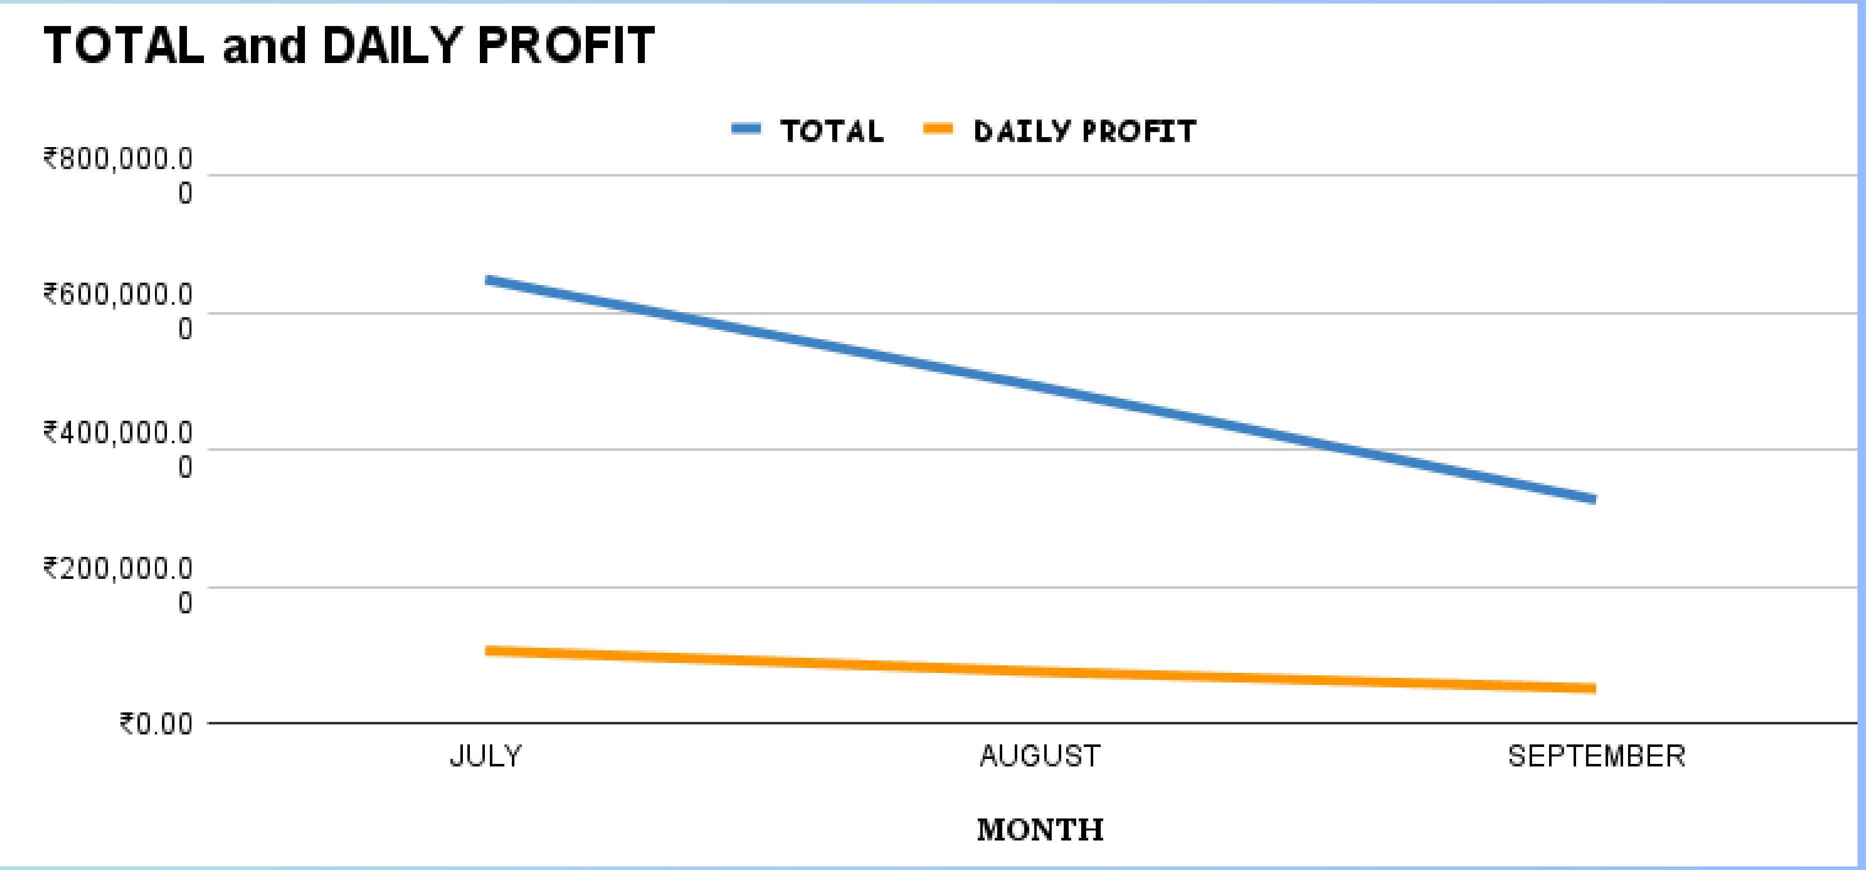
- The stacked column chart represents the profit figures across each location for different products of each company. Bazar contributes the most to sales and profit for each company, followed by Navapura and Alawalpur. Navpura is the least contributing location. This visualization provides a clear overview of the profit distribution for each company across various locations, helping to identify key contributors to overall profit.



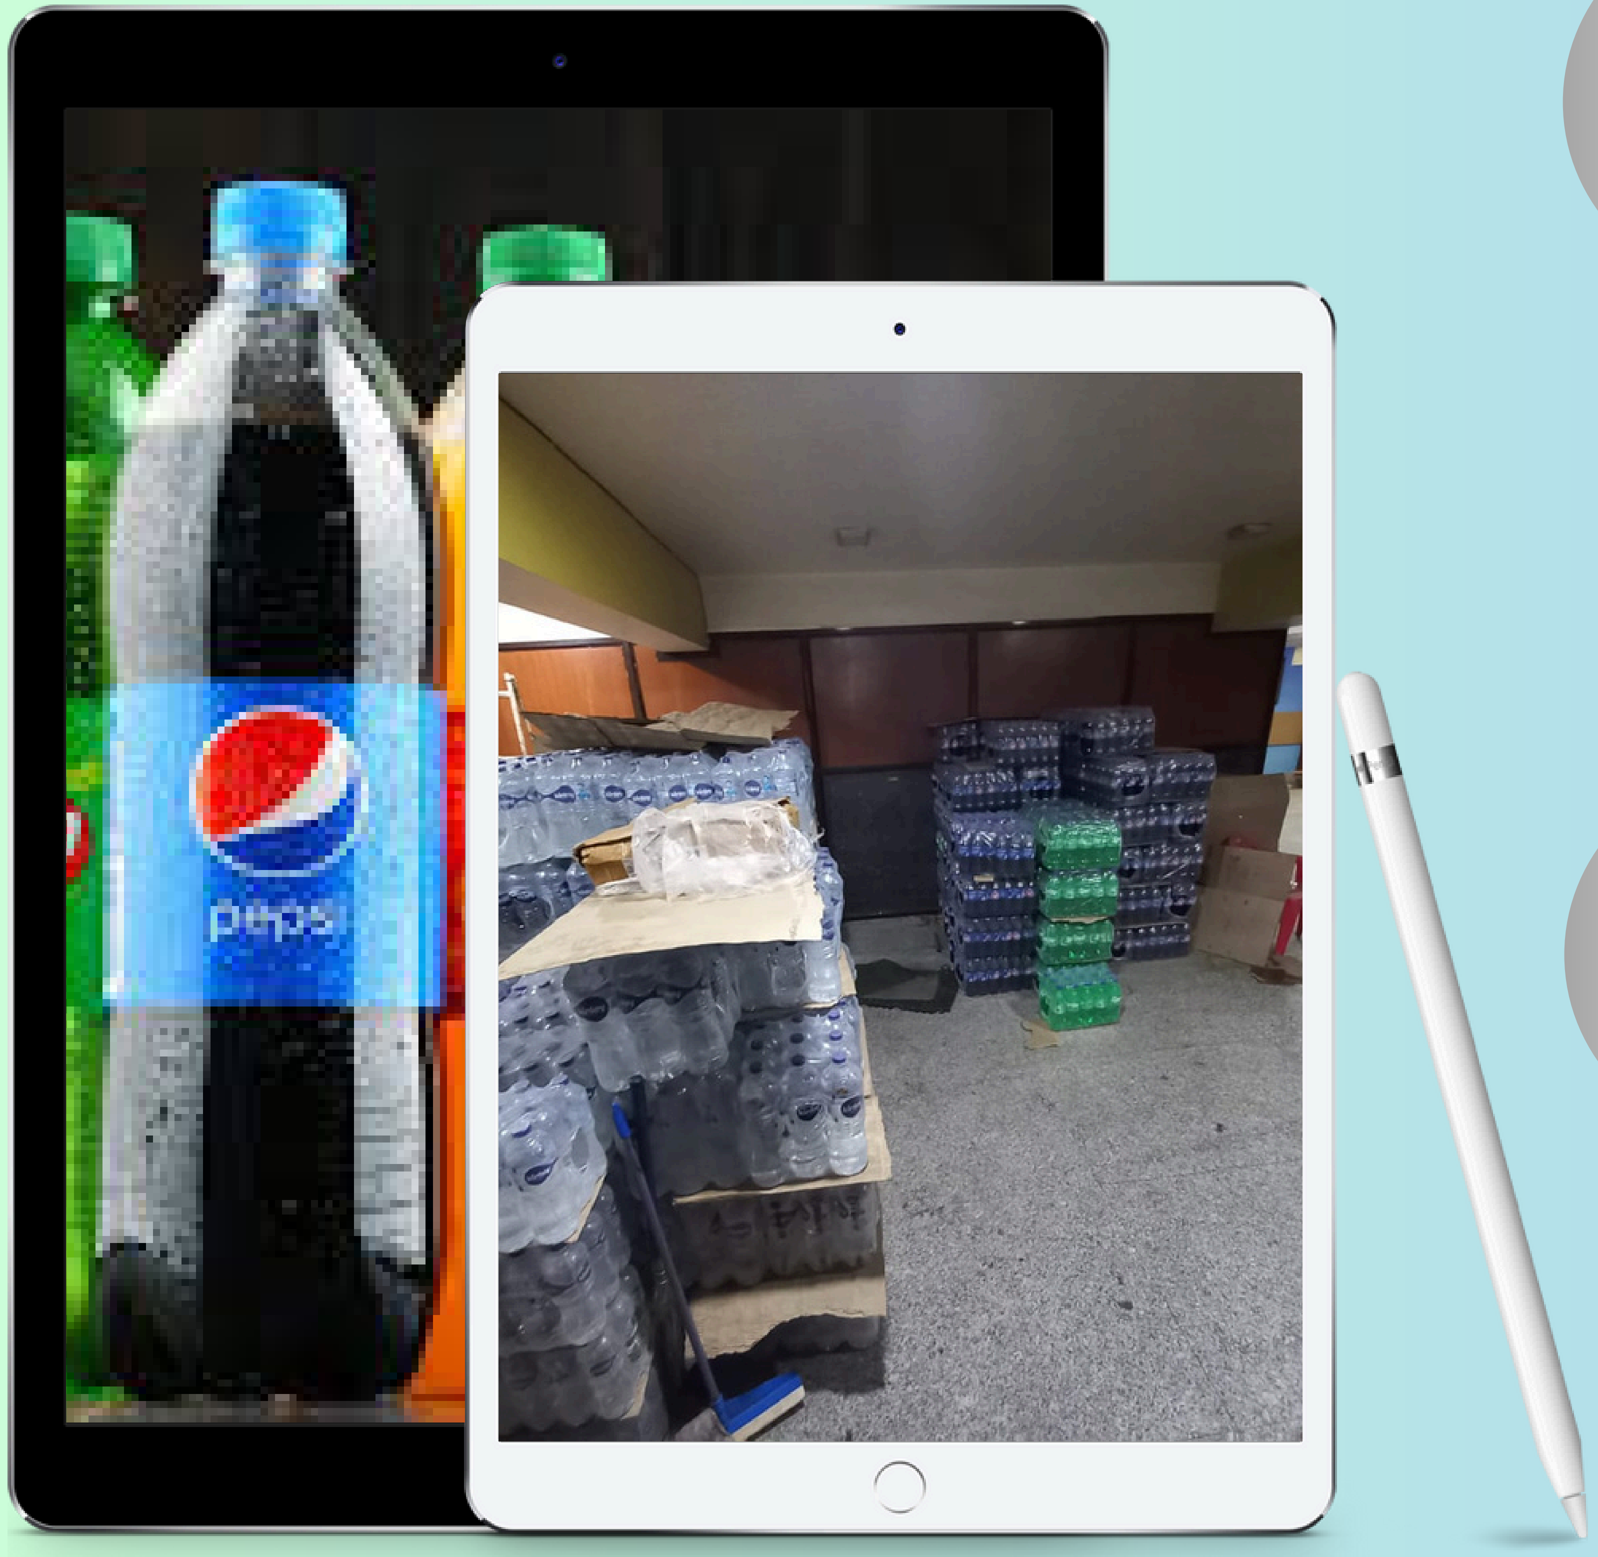
- The distribution of profits across different companies in the dataset shows that Coca-Cola contributes the most, followed by PepsiCo, with Parle Agro and Bisleri contributing the least. This information can help the owner make strategic decisions regarding resource allocation, investment priorities, and areas for improvement, focusing on maximizing profits from the top contributors while addressing any challenges with the lower contributors.



- July emerged as the top performer in monthly revenue, totalling ₹649,237.00, followed by August with ₹491,845. September recorded least monthly revenue of ₹327,310.00. Regarding monthly profit, July led the pack with the highest profit of ₹106,947.00, followed by August with ₹76,575.00. September reported the lowest profit of ₹51,625.



Recommendations



1

Implement flexible inventory management strategies that can quickly adapt to changes in demand. During peak month and periods, ensure sufficient stock to meet customer needs, while optimizing resources and availability of some new and demanded items during slower periods to make consistent sales.

2

Based on this analysis, it's advisable to conduct further investigations into other locations to identify areas for improvement in financial management practises. This could involve analysing expenses, optimizing pricing strategies, or implementing cost-saving measures to enhance overall profitability across all locations.

3

Based on this analysis, efforts should be directed towards replacing the product of Bisleri company with other alternative which is already in demand (such as Kinley by Coca-Cola). For least selling, strategies such as targeted marketing campaigns, exploring new customer segments, partnership campaign with local distributors and dealers can help to increase in sales. By focusing on improving the performance during least revenue months, business owner can capitalize on untapped market potential and enhance revenue.

4

The goal is to set prices that are competitive yet profitable, taking into account factors such as transportation costs, brand positioning, and the value proposition offered to customers. By conducting through market analysis encompassing competitor pricing, customer preferences, and market trends business can develop competitive pricing strategies, meet the evolving needs of customers, increase market share, and maintain profitability in a competitive marketplace.
